**CCSi awarded Navy's Seaport Enhanced prime contract vehicle**

ROCKVILLE, MD – June 2, 2005. Creative Computing Solutions, Inc. (CCSi) announced today that it has been awarded a prime contractor position on the U.S. Navy's Seaport Enhanced procurement vehicle. The contract is worth a total of \$3 billion annually. Competing in three out of the seven geographical zones and four out of the 21 functional areas determined by the Naval Sea System Command (NAVSEA), the team assembled by CCSi includes Perot Systems Government Services, Data Systems Analysts Inc., Learning Systems International Inc., Kirkpatrick Consulting, Pappas Associates and CryptoLex Inc.

The Seaport- e procurement vehicle was established in 2002 by NAVSEA centers to improve efficiency and reduce costs in performance-based service acquisition. In August 2004, the scope was expanded to comprise the Space and Warfare Systems Command (SPAWAR), the Naval Air System Command (NAVAIR) and the Naval Supply System Command (NAVSUP) among others, as additional Navy ordering agencies.

Through the diverse set of core capabilities of its team, CCSi will be able to submit proposals for engineering, software engineering, technical and network support, information systems development and Information Technology support solicitations in a large part of the country, covering the Midwest, the Mid-Atlantic and the National Capital regions.

The SEAPORT- e procurement vehicle has a base period of four years, followed by one five-year award term and one additional one-year award term, which could potentially extend the contract until 2015.
